

7 June 2022

Gold, copper and silver production in Azerbaijan

Anglo Asian Mining
Global Mining Finance Spring Conference

AIM: AAZ

Disclaimer

The information in this document is subject to updating, revision and amendment. This document neither constitutes nor forms nor should be constructed as constituting or forming part of any offer or invitation to sell or any solicitation of any offer to purchase or to subscribe for any securities in Anglo Asian Mining PLC ("Anglo Asian Mining") or any other body corporate or an invitation or inducement to engage in investment activity under section 21 of the UK Financial Services and Markets Act 2000 nor shall it or any part of it form the basis of or be relied on in connection with any contract therefore. This document does not constitute an invitation to effect any transaction with Anglo Asian Mining nor to make use of any services provided by Anglo Asian Mining. No reliance may be placed for any purpose whatsoever on the information contained in this document nor on assumptions made as to its completeness. No representation or warranty, express or implied, is given by Anglo Asian Mining, any of its subsidiaries or any of its respective advisers, officers, employees or agents, as to the accuracy, fairness or completeness of the information or opinions contained in this document or expressed in the presentation and, no liability is accepted for any such information or opinions (which should not be relied upon) or for any loss howsoever arising, directly or indirectly, from any use of this document or its contents or information expressed in the presentation.

The information and opinions contained in this document and the presentation are provided as the date of this document and the presentation and are subject to change without notice.

This presentation contains forward-looking statements that are based on Anglo Asian Mining's current expectations and estimates. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause actual events or results to differ materially from estimated or anticipated events or results implied or expressed in such forward-looking statements. Factors that could cause such difference include changes in world commodities and equity markets, political developments in Azerbaijan, changes to regulations affecting Anglo Asian Mining's activities and other risks involved in the mining industry. Any forward-looking statement speaks only as of the date on which it is made and Anglo Asian Mining disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Forward-looking statements are not guarantees of future performance and, accordingly, undue reliance should not be put on such statements due to the inherent uncertainty therein.

This presentation has been prepared in compliance with English law and English courts will have exclusive jurisdiction over any disputes arising from or connected with this presentation.

The information on reserves and resources included in this presentation has been extracted from an RNS announcement dated 2 November 2020 ("Gedabek Open Pit and Gadir Underground Mine - Revised JORC Mineral Resources and Reserves, Ugur Open Pit - Remaining Mineable Material, New Mine Life of Eight Years") and from an RNS announcement dated 24 March 2022 (Zafar JORC Mineral Resource completed – 6.8 million tonnes of mineralisation with average copper grade of 0.50 per cent.).

Introduction to Anglo Asian Mining PLC

Well-established Group now entering its third cycle of development and growth

First two growth phases: Early 2000's to 2019

- Company has been established in Azerbaijan since early 2000's
- Well established in Azerbaijan and very much part of the establishment
- First two development and growth phases:
 - **Early 2000's-2014:** gold doré production from open pit mining & heap leaching
 - **2014-2019:** agitation and flotation plants, underground mining, discovery of Ugur and concentrate production
- Solid financials: cash reserves, no debt and regular dividend payer since 2018

Current growth phase: 2020 to 2025 and beyond

- Contract areas in territory previously controlled by Armenia now restored
- 3 new contract areas added with Heads of Terms signed with the Government in 2021
- First investment outside Azerbaijan
- Regular discoveries of new sources of ore (Ugur, Gilar, Zafar and Gosha new vein)

Capital Structure and Share Price Performance

Very simple capital structure - AIM listed and no recent changes in the number of shares issued

AIM Market
AAZ

Share Price*
96.77

Ordinary shares in issue
114,392,024

Market Cap
£113.56m

380,000 share options outstanding at an average price of 113p
*Closing price 31 May 2022

Major Shareholders

■ Reza Vaziri

■ Governor John Sunumu

■ Limelight Industrial Developments
(Vaziri family)

■ Other directors & Management

■ Other

Board of Directors

Highly regarded board members with excellent relationships in Azerbaijan

Khosrow Zamani *
Non-Executive
Chairman

Former director Southern Europe and Central Asia of the International Finance Corporation ("IFC")

Oversaw the IFC portfolio of more than US\$2 billion, diversified across the financial, oil and gas and mining industries

Governor John Sununu
Non-Executive Director

Two terms Governor of New Hampshire, USA
Chief of staff to President George H.W. Bush

Former partner in Trinity International Partners and currently President of JHS Associates, Ltd

Reza Vaziri
President and CEO

Head of the foreign relations office at the ministry of the Imperial Court of Iran before moving to the US in 1980

Prominent businessman in Azerbaijan

Professor John Monhemius *
Non-Executive Director

Over 40 years experience in hydrometallurgy and environmental control in mining and metallurgical processes

Acted as a consultant to large mining and chemical companies

Michael Sununu
Non-Executive Director

Wealth of financial and directorial experience and former board member of Optima Bank & Trust

Founder and Manager of Sununu Enterprises LLC and Sununu Holdings LLC and consultant to energy, materials and infrastructure industries

**Independent non-executive director*

Senior Management

Very stable operational team with many decades in the mining business

Farhang Hedjazi
Senior Vice
President, Technical
Services

Worked in the field since 1985 and constructed process plants including zinc smelters, CIL plants, gold heap leach facilities and managed underground mines

MSc. In non-ferrous extractive metallurgy

Bill Morgan
Chief Financial
Officer

UK chartered accountant over 40 years

Regional CFO
Kinross - Russia
Region, CFO
Hambleton Mining
plc and Bakyrchik
Gold plc

20+ years
experience in the
gold mining
industry in Russia /
FSU

Stephen Westhead
Vice President

Chartered Geologist with over 30 years of experience in India, CIS, Eastern Europe and Russia

Project management expertise from exploration, construction and production

PhD in structural controls on mineralisation, a MSc in Mineral Exploration and Mining Geology and a BSc in Applied Geology

Amirreza Vaziri
Business Development
Director

Previous roles ranging from co-founder and CEO of Tech Startup to Director of Business Development at an international technology company.

Strong focus on Partnerships & M&A, in line with Anglo Asian's strategic vision for growth.

B.A in International Business from the University of Maryland's Smith School of Business, MSc in International Management from Kings College London.

Anglo Asian Mining's Current Operations

Gedabek open pit near end of its life, declining production to be augmented with Vejnaly (2022) and Zafar (2023)

Six Contract Areas ("concessions") in Azerbaijan

Gedabek: The current main production site

Gosha: Hosts a small underground mine

Ordubad: Early-stage exploration area

Soutely, Kyzilbulag and Vejnaly: Access only to Vejnaly which was obtained in late 2021

Mining at Gedabek from both Open pit and Underground mines

Variety of production methods

Crushed and ROM Heap Leach: gold and silver doré

Agitation (tank) Leach: gold and silver doré

Flotation and SART production: Copper and gold concentrate

Gedabek site very well established with excellent infrastructure

Power from the electricity grid

Water treatment plant - potable water

Excellent road access to Baku and Georgia

FY 2021 financial results / operational update

Performance in line with expectations despite inflationary headwinds

Total FY21 production of 64,610 GEO

- (2020: 67,249 GEO)
- Lower gold produced of 48,680 ounces in 2021 compared to 56,864 ounces in 2020

Turnover of \$92.5m in FY21

- (2020: \$102.1m)
- Lower production offset by increased copper prices

AISC of gold produced at \$843/oz

- (2020: \$702/oz)
- Across the board cost inflation experienced especially for reagents and fuel and low grade of gold ore processed

Profit before tax of \$12.6m

- (2020: \$35.7m)
- Higher AISC and \$6.1m of opening inventory expensed

Free cash flow of \$12.2m

- (2020: 28.7m)
- Lower cash flow in step with lower profitability
- Ending cash in bank of \$37.5m (2020: \$38.8m)

Final 2021 dividend of \$0.035, bringing FY21 dividend to \$0.08

- FY21 total dividend of \$0.08
- Maintained at 2020 levels excluding special dividend of \$0.015 paid in 2020

Five-year extension to Gedabek contract area approved, first of two permitted extensions

Developments during Covid-19 (Since early 2020)

New Growth drivers have emerged during COVID-19 pandemic

Agreement to acquire three new contract areas and relinquish Soutely

Xarxar and **Garadagh** are adjacent to Gedabek / Gosha to create a continuous area

Demirli is adjacent to Kyzlbulag – they now fully encompasses the Demirli mine

Exploration “wins” at Gedabek and Gosha

Final Resource for **Zafar** now published – new copper mine at Gedabek

Gosha new vein discovery at Gosha underground mine

Significant geological exploration program on-going

Restoration of three new contract areas following resolution of conflict with Armenia

Significant operation at **Vejnaly** ramping up following granting of access

Kyzlbulag hosts the existing Demirli copper/moly mine

Russian peacekeepers at **Demirli** but whether this will prevent our future access is uncertain

First investment outside Azerbaijan

19.8 % acquired of **Libero Copper & Gold Corporation**

Libero has a significant portfolio of exploration properties in the Americas

Restored contract areas: Kyzlbulag & Vejnaly

A mixture of existing mines with excellent exploration potential and production from Vejnaly this year

Kyzlbulag – Demirli deposit

- Deposit hosts a Cu/Mo mine – no current mining
- Report published in 2016 that the mine contains 275,000 metric tonnes of copper
- Intact plant in which the “Vallex Group” claim to have invested US\$130 million
- Armenian Government have announced the mine contains enough reserves for 25 years
- Russian peacekeepers present – operation will commence once access is granted by the Government of Azerbaijan

Source: Google Earth

Vejnaly – Zangilan region of Azerbaijan

- Contains the Vejnaly deposit which has been partially mined
- Staff now permanently resident on site and mine planning underway
- Site assets transferred to the Company free of charge
- Activity steadily ramping up with production commencing in H2 2022

New Concessions Agreement – September 2021

Transformational acquisition of three new concessions containing existing mines and known deposits

Transaction demonstrates the Company's long standing partnership with the Government of Azerbaijan

Company granted 3 new contract areas following a review of its existing contract areas

Transaction is subject to the ratification of the Parliament of Azerbaijan

Soutely contract area has been relinquished

LAND UNDER CONCESSION FOLLOWING RATIFICATION OF AMENDED
PSA

2,544 SQUARE KILOMETRES

COPPER RESOURCE OF EXISTING PORTFOLIO + NEW CONCESSIONS +
ZAFAR + OUR SHARE OF LIBERO

OVER ONE MILLION TONNES

Garadagh and Xarxar together with Gedabek and Gosha will create one continuous territory of **1,408** square kilometres

Garadagh contains a known porphyry copper deposit with an in-situ resource of over **300,000** tonnes of copper

Xarxar shows significant potential as it is likely part of the same Garadagh mineral system

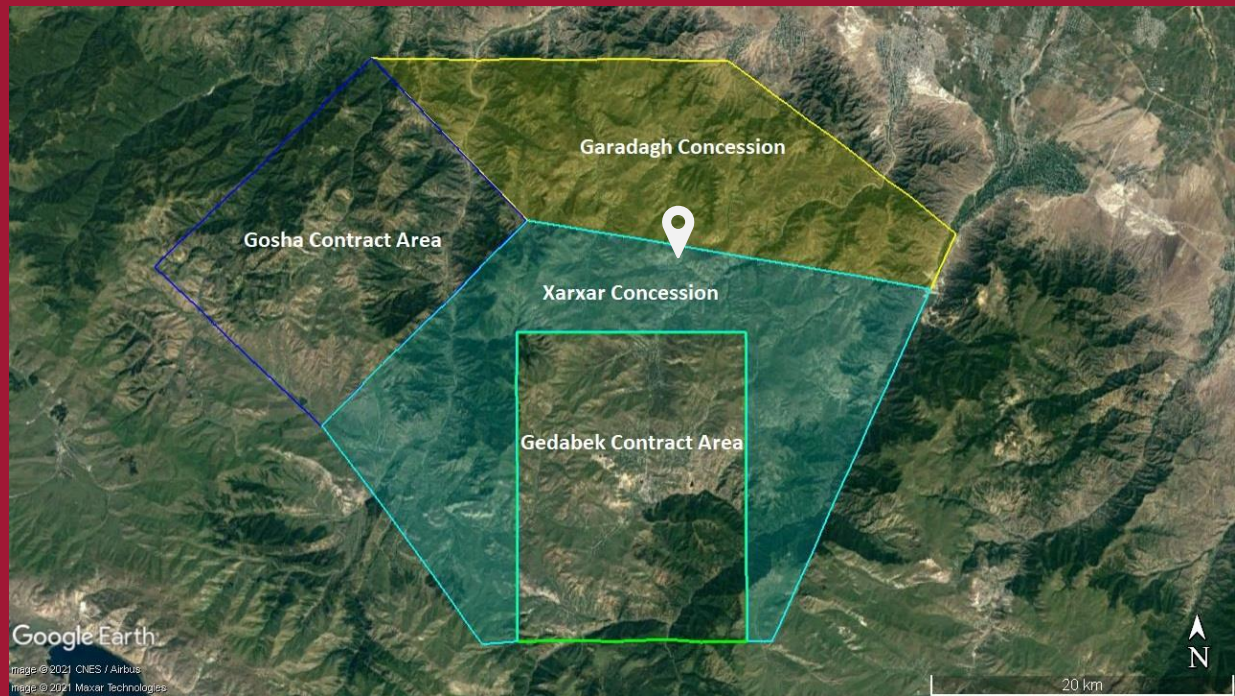

Demirli is adjacent to Kyzilbulag in Karabakh and contains **275,000** tonnes of copper

New Contract Areas : Garadagh and Xarxar

A major porphyry copper resource with over \$3bn of in-situ copper

Map of the new Garadagh and Xarxar contract areas

These two areas, together with Gosha and Gedabek create one continuous area of 1,408 square kms

📍 Soviet resources of the Garadagh deposit at 1 January 1992

| Garadagh deposit - copper content | | | | |
|-----------------------------------|---------------------|-------------|-------------|-----------------|
| | | Category C1 | Category C2 | Total C1 and C2 |
| Ore | Millions of tonnes | 25.35 | 23.69 | 49.04 |
| Copper content | Thousands of tonnes | 168.0 | 150.7 | 318.7 |
| Grade | Per cent. | 0.65 | 0.64 | 0.64 |

Exploration Win: New Zafar Mine at Gedabek

Mine planning now well underway with production starting next year

Copper-gold mineral occurrence approx.
1.5 kms NW of the Gedabek processing plant

Final JORC Mineral Resource: March 2022

- 6.8 mt of mineralisation: 0.5% Cu, 0.6% Zn and 0.4 g/t Au
- In-situ Mineral Resource of 28,000t of Cu, 73,000oz of Au and 36,000t of Zn

Ore reserves anticipated in H2 2022

Total drilling carried out
approximately 41,000 metres

Mining to commence mid-2023

- Sub-level caving and/or cut and fill mining
- Haulage of ore to plant using existing contractors trucks

Existing flotation plant to be modified

- Third line for zinc and some upgrades
- No major capital investment

1 million of tonnes of ore processed p.a.

- ~ 10,000 ounces of gold pa
- ~ 4,000 tonnes of copper pa
- ~ 4,800 tonnes of zinc pa

Ore mined from open pit will be treated by leaching with the copper extracted by the SART plant once Zafar is operational

Current Exploration Activity

Extensive exploration programme underway which delivers results

Active Contract Areas

Gedabek Contract Area

- Zafar drilling now stopped as mineral resources completed but one rig operating in the vicinity to look for extensions
- Reverse circulation drilling of open pit continuing for grade control and to define further mineralisation
- Two rigs operating at Gilar
- One rig operating at the Avshancli property

Gosha Contract Area

- Surface drilling now stopped
- Extensive underground exploration programme underway at the Gosha mine to define the mineralisation limits of the new “Hasan” vein
 - Underground tunnels are being widened and drill galleries are being constructed

Exploration and Development Opportunities

Ordubad Contract Area

462 square kilometres in Nakhchivan region of Azerbaijan

- Exploration activities have been very limited as access to the site has been curtailed due to COVID-19

Restored Territories

Vejnaly and Kyzlbulag contract areas

- No exploration currently at Kyzlbulag as access has not yet been obtained
- Exploration programme for Vejnaly is now being planned and agreed with the Government

New Contract Areas

Garadagh, Xarxar and Demirli deposits

- No exploration as access has currently not yet been obtained
- Extensive exploration already at Garadagh with data handed over upon ratification
- Exploration will commence at existing underground tunnel at Xarxar upon ratification

Investment in Libero Copper & Gold Corporation – December 2021

First investment outside of Azerbaijan

Acquisition of 19.8% stake in Libero Copper & Gold Corporation completed in January 2022 for CAN\$6.3 million

Anglo Asian Non-Executive Director Michael Sununu appointed to Libero Board

Strategic partnership established with Libero to determine future exploration strategies

Highly experienced and competent management team

Libero is listed on the TSX Venture Exchange (ticker: LBC) in Canada and owns, or has the option to acquire, several copper exploration properties in North and South America.

Libero has strong relationships with local communities across its geographies and is committed to maintaining its social licence to operate.

Libero's portfolio of exploration assets includes:

Mocoa

One of the world's largest undeveloped copper-moly resources

Putumaya, Colombia

Big Bulk

A porphyry copper-molybdenum deposit

British Columbia, Canada

Big Red

A porphyry copper-gold target

British Columbia, Canada

Esperanza

A porphyry copper-gold and epithermal gold project

San Juan, Argentina

The acquisition is in line with the Company's strategy of increasing its interests in copper and gold properties both in Azerbaijan and Internationally.

Anglo Asian Investment Case

Cash generative

Cash generative with no debt

Growth potential

Clear strategy focused on both Azerbaijan and international expansion

Fast track ability

Production from recent new discoveries and restored contract areas in 2022

Experienced team

Highly qualified team with strong in-country relationships

Low cost

Operations in the lowest quartile of the cost curve

Strong balance sheet

Solid capital position available to finance growth

Reliable dividend payer

Regular dividends payable since 2018

First mover advantage

Only listed miner in Azerbaijan

Appendices

Appendix 1 Contract Areas (after ratification)

Eight contract areas with a land area of over 2,500 square kilometers

Appendix 2 – Mining / Processing in FY 2021*

The Company produces ore from various mines with several processing options

Gedabek Open Pit

- Producing gold and copper since 2009
- 1,815,857 tonnes of ore at 0.74 g/t gold mined in FY 2021***

Gedabek Underground

- Portal opened and tunnelling now connected to Gadir UG mine
- 248,792 tonnes of ore at 1.42 g/t gold mined in FY 2021***

Agitation Leaching†

- Similar to CIL except uses resin not carbon
- Processed 641,391 tonne of ore of average grade 1.68 g/t gold in FY 2021***

Gadir Underground Mine

- Commenced production in 2015 and tunnelling now connected to Gedabek UG mine
- 115,943 tonnes of ore at 1.91 g/t gold mined in FY 2021***

Gosha Underground Mine

- Company's first underground mine
- New vein "Hasan" recently discovered at the mine**

Flotation Processing

- Produces concentrate from copper rich ore
- Treated 478k tonne of ore containing 2,529 tonnes of copper in FY 2021***

† The Company also processes ore by crushed ore heap leaching and run-of-mine (ROM) heap leaching

* 12 months to 31 December 2021

Appendix 3 – Zafar Deposit

Mineral Resources, November 2021 (classified according to the JORC Code)

| Mineral Resources | In-situ grades | | | | Contained metal | | |
|------------------------|--------------------------|------------------|------------------|----------------|-----------------|---------------|---------------|
| | Tonnage (million tonnes) | Copper grade (%) | Gold grade (g/t) | Zinc grade (%) | Copper (tonnes) | Gold (ounces) | Zinc (tonnes) |
| Measured and indicated | 5.5 | 0.5 | 0.4 | 0.6 | 25,000 | 64,000 | 32,000 |
| Inferred | 1.3 | 0.2 | 0.2 | 0.3 | 3,000 | 9,000 | 3,000 |
| Total | 6.8 | 0.5 | 0.4 | 0.6 | 28,000 | 73,000 | 36,000 |

Copper cut-off grade of > 0.3 per cent. copper equivalent
All tonnages reported are dry metric tonnes

Gold, copper and silver production in Azerbaijan

AIM: AAZ
